

2015 United States and Canada Household Moving Migration Patterns

Migration Patterns

The annual Atlas Van Lines Migration Patterns Study provides a snapshot of relocation patterns. The 2015 study shows changes in the Northeast and Western regions of the United States and the Canadian provinces. But, the most significant changes took place in the South and Midwest of the United States.

Shipments noted for Canada are cross-border to the United States or from the United States (not inter-provincial).
